## PRESS RELEASE

### One-Day Training Workshop for CEOs

*Belmopan. August 26, 2021. 12:00 p.m.*

On Friday, August 27, 2021, the Ministry of the Public Service, Constitutional and Political Reform will be hosting a Strategic Training Session for chief executive officers (CEOs) within the Government of Belize. Earlier this year, the ministry held two other workshops, one for administrative officers and the other for finance officers.

In both those sessions, it was recognized that a sensitization training for the new CEOs would be most effective in strengthening their understanding of policies and regulations governing the public service. The idea was welcomed by the CEOs and the Training Unit of the ministry began organizing the workshop.

The morning session of the training will feature the human resource management processes, policies, procedures and related legislations. An overview of the role of the Ministry of the Public Service Constitutional and Political Reform and its symbiotic relationships with the Services Commission, line ministries and Ministry of Finance will be highlighted. The afternoon session will focus on the accounting procedures in the government service and the governing regulations.

The ministry has been cognizant of the current economic circumstance and has ensured to keep costs at a minimum. At the end of this workshop, the team from the ministry expects that CEOs will be able to improve good governance within their ministries.

The Ministry of the Public Service, Constitutional and Political Reform thanks the CEOs for their willingness to learn more about their role in helping to build a better and stronger Belize. The ministry remains committed to promoting personal development in all public officers and continues to build a more dynamic civil society.
