## PRESS RELEASE

### **MOHW Announces Launch of Health Pass Vaccination App**

*Belmopan. December 2, 2021. 4:20 p.m.*

The Ministry of Health & Wellness informs the public of the launch of its Health Pass Vaccination App, accessible to all by downloading the app from the Apple or Android store. The app provides users with an electronic copy of their vaccination card.

The information provided will be dependent on the accuracy and timely input of the user's vaccination records in the system along with their Social Security number or Belize health information number.

The ministry encourages the public to use the app as an option to provide proof of COVID-19 vaccination. It is anticipated that the app will provide a quick, reliable, reader-friendly record.

Additional information and troubleshooting concerns have been assigned to a specific unit within the ministry to ensure prompt action. Please contact the ministry for assistance to locate records at (WhatsApp/text) 669-8843 or 613-1096. While the app is recognized locally, the ministry continues to work with other countries for international recognition.

The public is also reminded that the COVID-19 vaccines are available at all facilities. The vaccine is the strongest line of defense against COVID-19.
